

# Daniel A. Gonzalez

Los Angeles, CA | [gonzalez19991012@gmail.com](mailto:gonzalez19991012@gmail.com) | <https://github.com/dgonz271> | <https://linkedin.com/in/dgonz271> | <https://www.daniel-gonzalez.me/index.html>

**Objective:** I am a third-year undergraduate student looking for a position with hands-on experience and a great opportunity to grow as a programmer as well as a professional in the work environment.

TECHNICAL SKILLS:	Java	Python	MySQL	HTML	Eclipse IDE
	Android Studio		Photoshop		MSOffice

**EDUCATION:**

## Bachelor of Science, Computer Science

California State University, Los Angeles, Los Angeles, CA

Spring 2022

- GPA: 3.95 — Dean's List

## CodePath Android Mobile App Design Course, Remote

December 2018

- Mobile app design workshop series that provides hands-on experience by combining product development, coding, and design. Technical mobile apps created with Java, XML, Android Studio

**CodePath Android University Course, Remote**

February 2019

- Project-based course explores further into Android app development by focusing on UI design and implementation of RESTful API clients to create multiple fully functional applications

## EXPERIENCE & PROJECTS:

### ESSC Peer Advisor

Sept 2019 - Present

- Coordinate and consult with ECST students to discuss current academic progress and plan future terms
- Work under a Staff Advisor to complete various daily duties in the office
- Serve as a resource for students who need assistance with advising or finding other academic support

## ESSC STEP Supplemental Instruction Leader

June 2019 – August 2019

- Worked with other SI Leaders to strengthen the math skills of incoming freshmen in the engineering field
- Reviewed and demonstrated daily homework problems assigned by their professor
- Created daily worksheets and weekly tests for students to effectively prepare them for higher-level math
- Supported and prepared incoming freshmen for college by guiding them through independent and group learning

**MyJabber**, Android Application | <https://github.com/dgonz271/MyJabber> |

Feb 2019

- Utilized Twitter REST API to allow users to view their real Twitter home timeline
- Implemented OAuth login so users can login to their accounts securely
- Users can successfully create and post a tweet from MyJabber

**Gramify**, Android Application | <https://github.com/dgonz271/Gramify> |

Feb 2019

- Successfully created a photo sharing app similar to Instagram using Parse as a backend to store data
- Users can create accounts using Parse authentication and snap/post photos

**Coolflix**, Android Application | <https://github.com/dgonz271/Coolflix> |

January 2019

- Accessed The Movie Database API for the purpose of displaying a list of current movies and their information
- Improved upon by allowing movie trailers to be accessed as well as modifying visual aspects to the app

**Password Generator**, Android Application | <https://github.com/dgonz271/PasswordGenerator> | December 2018 – January 2019

- Serves as a complex password generator for greater security and allows users to save and name their generated passwords
- Improved upon by creating a smoother UI\UX

**CLUBS:**

Association for Computing Machinery (ACM) | Aug 2018 – Present
