Daniel A. Gonzalez

Los Angeles, CA | gonzalez19991012@gmail.com | https://github.com/dgonz271 | https://linkedin.com/in/dgonz271 | http://www.daniel-gonzalez.me/index.html

Objective: I am a second-year undergraduate student looking for a position with hands-on experience and a great opportunity to grow as a programmer as well as a professional in the work environment.

TECHNICAL SKILLS:

Java	Python		MySQL
Eclipse IDE	Android Studio	Photoshop	MSOffice

EDUCATION:

Bachelor of Science, Computer Science

California State University, Los Angeles, Los Angeles, CA   Spring 2022

- GPA: 3.97
- Dean's List

CodePath Android Mobile App Design Course, Remote   December 2018

- Mobile app design workshop series that provides hands-on experience by combining product development, coding, and design. Technical mobile apps created with Java, XML, Android Studio

CodePath Android University Course, Remote   February 2019

- Project-based course explores further into Android app development by focusing on UI design and implementation of RESTful API clients to create multiple fully functional applications

EXPERIENCE / PROJECTS:

MyJabber, Android Application | https://github.com/dgonz271/MyJabber | Feb 2019

- Utilized Twitter REST API to allow users to view their real Twitter home timeline
- Implemented OAuth login so users can login to their accounts securely
- Users can successfully create and post a tweet from MyJabber
- MyJabber's UI is inspired by Twitter's Dark Mode for a more authentic feel

Gramify, Android Application | https://github.com/dgonz271/Gramify | Feb 2019

- Successfully created a photo sharing app similar to Instagram using Parse as a backend to store data
- Users can create accounts using Parse authentication and snap/post photos
- Developed unique UI while maintaining a similar structure to the real Instagram

Coolflix, Android Application | https://github.com/dgonz271/Coolflix | January 2019

- Accessed The Movie Database API for the purpose of displaying a list of current movies and their information
- Improved upon by allowing movie trailers to be accessed as well as modifying visual aspects to the app

Password Generator, Android Application | https://github.com/dgonz271/PasswordGenerator | December 2018 – January 2019

- Application serves as a complex password generator for greater security and allows users to save and name their generated passwords
- Improved upon by creating a smoother UI\UX

CLUBS:

Fairfax Interact Club | Aug 2016 – June 2017

Association for Computing Machinery (ACM) | Aug 2018 – Present

AWARDS:

First place in ACM Arduino Robotic Car Competition Fall 2018

First place in ACM Web Development Project Spring 2019

Dean's List | 2017 – 2018 Academic Year
